Steps To Enable Facebook Login

1. Navigate to <u>Facebook Developers</u> section and login to your Facebook account, if you are not logged in already. **This should not be your business account.**

If you are here first time, you will see the screen shown in the screenshot below. If you have created apps before, move to step 3.

2. Select the role that describes you better

evelopers			Products	Programs	Docs	More
		⊘ Regist	ter 2 About Y	ou		×
	Wł	nich of the foll	owing best de	scribes you?		no
\leq		Developer	\bigcirc	Marketer		ne
	000	Analyst	Ŕ	Product Manager		nin
		Student	ക	Owner/Founder		
		Ô	Other			

Click Create App button and navigate to step 4.

Search apps Q	
Ð	App ID: Status: • Live
Add a New App	Secebook Login

4. Select For Everything Else

5. Specify the name of your app in App Display Name option (You can enter whatever name you like, but it's recommended to enter your website or company name in this field), specify your App Contact Email, leave Do you have a business manager account option as is and click Create App ID button

10. Specify your website domain in **App Domains** option. For example, if your website's homepage url is **www.mywebsite.com** or **mywebsite.com**, you have to

save **mywebsite.com** and **www.mywebsite.com** in this option. Note that you have to save **two** domains here.

Note: If your website url has directory/folder after domain (For example-

http://www.mywebsite.com/dir), then save domain without directory/folder appended to it (mywebsite.com and www.mywebsite.com) in above option.

Specify Privacy Policy URL.

Select the category that your website belongs to, in the **Category** option. Optionally, you can upload **App Icon**. This will be shown to users when they authorize your app on first Facebook Login.

15. Add following url in Valid OAuth Redirect URIs option:

Append /social-auth/facebook/callback to the homepage url. For example, if http://mywebsite.com is the homepage url of your website, you need to save http://mywebsite.com/social-auth/facebook/callback in this option (Keep https or https://www as per your website configuration or Copy paste your homepage URL from browser address bar)

Make sure that **Client OAuth Login** and **Web OAuth Login** options are set to **Yes** Leave other options as is.
